

ADVANCE IN MAMMOTH

Utah and Galena in Demand at Advancing Figures.

AFFAIRS AT CAMP DELAMAR

SPLENDID SHOWING IN THE MAGNOLIA GOLD MINE.

Which is Developing Into a Magnificent Producer—Working All the Men That Can Be Employed, Who Are Blocking Out Fine Bodies of Rich Ore—Trial Run to Be Made on the Product of This Property by the De Lamar Mill—J. M. Harwood, a Former Salt Lake, Strikes it Rich—At Rocky Bar, Idaho—Activity in This Famous Old Camp—The Baisley-Elkhorn—Busy Scene on Elkhorn Mountain—The New State Mine, at the Mouth of Little Cottonwood—Bond Secured on This Promising Gold Mine—The Star Consolidated—Developing the Property and Shipping Ore—Activity at Silver City.

The mining share market was fairly active yesterday in the pit of the exchange and the listed stocks made a good showing, in sales as well as in the advances that were chronicled during the call.

At the first jump out of the box gains were noted in Anchor and Ajax, although neither of these securities recorded any sales. Bullion-back was not quite as strong in the bidding as on the previous day and suffered an slight decline. Daly and Daly West were stationary at yesterday's quotations, but were inactive. Galena scored advances and recorded sales, and it is estimated that this stock will enjoy gradual advances from this time on. Greyer drew out considerable inquiry, but buyer and seller could not get together. The most noticeable feature of the call, however, was the rapid advance made by Mammoth, which jumped from \$1.92 1/2 to \$2.00, the closing bid of the day before, to \$2.20, and sales were registered at this figure. Silver King was wanted at an advance in the bidding but none of the stock was offered. Mercury was slow and in fact little demand, while Sunshine was ignored.

The call of the unlisted stocks was somewhat featureless. Swansea was somewhat stronger in the bidding and Valeo exhibited a little more strength with the demand quite active for the stock. Northern Light held its own at 85 cents in the bidding and was firmly held at 82. Little Pittsburgh made sales at 3 1/2 cents, and a block of Dalton changed hands at 2 1/2. Buckeye was firm but inactive.

The transactions of the day were as follows:

SALES OF STOCK.

100 Galena at \$1.25.
100 Galena at \$1.25.
100 Mammoth at \$2.20.
100 Silver King at \$1.97 1/2.
1,000 Little Pittsburgh at 3 cents.
700 Dalton at 3 1/2 cents.
Total sales, 2,300 shares.
Value of sales, \$535.50.
The closing quotations were as follows:

Name of Stock.	High.	Low.
Anchor	1.40	1.35
Ajax	.81	.81
Bullion-back	7.25	8.40

OLD CHAINMAN MINE

Negotiations Pending For This White Pine Producer.

A BIG REORGANIZATION

RECONSTRUCTION OF THE BUTTE AND BOSTON.

The New Company Now In Possession—Starts In With a Million Dollars Capital—The Great Mines of the Company Have Been Kept Out and Are In Excellent Condition—Mining at Great Depth—Working Successfully at 4,900 Feet in the Calumet and Hecla—A New Company—The New Humboldt Files Articles of Incorporation—The Consignments of High Grade Galena and Utah Ores—Showing in the Brooklyn—Ore and Bullion—Silver and Lead—Mining Notes and Personalities.

Hon. J. B. Williamson of Cherry Creek, Nev., who is assessor and treasurer of White Pine county, that state, is in the city for the purpose of consulting an oculist.

Mr. Williamson is one of the oldest citizens of White Pine county. In fact, he is one of the pioneers of that county. Has served the people of that region in an official capacity for many years, and he has the respect and esteem of all who know him.

Mr. Williamson was in White Pine when the boom was on during the early days when silver was worth \$1.25 an ounce, and he states that everything was pushing and activity there at that time was at its height. He has been a witness to the rise and fall of eastern Nevada, and while the gloomy days of inactivity have not entirely disappeared as yet, still he is optimistic that the outlook is brightening, not because of the return to silver mining, but on account of the fact that interest is now being taken in the gold mines of that locality, and he is confident that the future of the county will be brightened by the rich silver mines of the old deserted camps of the county who once again come to the front as wealth producers, and he hopes that he may soon see the day.

Mr. Williamson informs The Herald that a deal is now pending for the purchase of the old Chainman gold mine, which is one of the most valuable producers of the precious metals in the state. Charlie Lay, the bonanza king of California, is negotiating for the property, and the present time is on the ground for the purpose of making an examination of the mine, on which development work is now being carried on. The old Chainman mine has large bodies of high grade gold ore being blocked out. If the deal is consummated it will mean much for White Pine county, as the new purchasers will not only develop the mine, but work the property in a thorough manner.

The Ben Hur mine, which has been called on the board of the mining exchange, is owned by Mr. Williamson, and it is a valuable property, and that while the ore bodies in this mine are not large, they are very rich. The company is also developing a fine ranch and water rights.

The North Mountain, formerly known as the San Jose, also located near Cherry Creek, is a valuable property, and it is owned by Salt Lake and Nebraska people, and Mr. Williamson has no doubt but that during the coming season this property will make a splendid record, as the immense amount of ore in sight in the mine, and it has been demonstrated that it can be worked successfully by the cyanide process and amalgamation.

Mr. Williamson looks for considerable activity in Cherry Creek this year, and he is sanguine that the time will soon come when White Pine county will come to the front as a great producer of the precious metals.

AT ROCKY BAR.

Much Activity in the Famous Old Camp This Winter.

W. C. Austin came in a few days ago from Rocky Bar which he states is covered with three feet of snow, making fine sleighing, says the Statesman. Mr. Austin, who is a former prospector of that and surrounding camps, he stated that the New Nicholas is running steadily and employs a force of from six to eight men. The mine is taking out ore from a strong two foot vein that will mill 3 1/2 and upward to the ton, leaving from six to eight feet of ore standing that will mill from 10 to 12 per cent in gold. The mine is being worked by the White West are taking out ore that will assay from \$100 to \$200 per ton in gold. This mine has been working from three to four years, and has been abandoned for a year or more by its owners, an English company who disagreed about its management.

The Mountain View at Pine Grove is working at a fine pace, and showing a large body of ore. The third mine is being operated by Oliver Sloan.

THE BALSLEY-ELKHORN.

A Busy Scene Presented at Elkhorn Mountain.

A visitor to the scene of operations of the Balsley-Elkhorn Mining company at Elkhorn mountain this week, says the Democrat, of Baker City, Ore., was Mr. C. W. James, who returned to the city yesterday.

Mr. James says he was surprised at the busy scene presented at the mine and is pleased to state that Superintendent Symms has got the old property in first class working order.

There are about 30 or 35 men employed in the mine and mill, the bins at the mill are overflowing with ore and the supply of concentrates is large. The mine is kept running night and day.

A fine body of ore with values running as high as \$100 per ton was being taken out in the mine, and preparations are being made to ship the high grade ore, together with concentrates in a few days. Mr. James was shown about 2,000 ore sacks just received at the mine. These will be filled and hauled down the mountain at once.

Superintendent Symms is much elated over the flattering prospects presented by recent developments in the mine and sees nothing in the way to prevent steady operations.

The New State Mine.

The interest that has been taken lately in the Copper mine, at the mouth of Little Cottonwood, mention of which was made in yesterday's Herald, has directed attention to the New State group, adjoining, and it was learned last night that a considerable amount of the capital stock of the company, which is the controlling interest, for a period of nearly three months, besides which a fine vein of gold ore, which the yellow metal is visible to the naked eye.

The mineralization at the mouth of Little Cottonwood is all that could be desired, and it is only a question of time until this locality comes to the front with one or more producing and paying mines.

The Star Consolidated.

W. J. Lawrence, superintendent of the Star Consolidated mine, near Silver City, Tintic, who was in the city yesterday, informs The Herald that the new double-compartment shaft in this property is now down to the 200 level, at which point a station is being cut.

In the old workings of the mine pay mineral is being taken out and shipments of ore are being made regularly that will carry values of 20 ounces silver and \$10 in gold to the ton.

Mr. Lawrence states that there is a great deal of activity in the vicinity of Silver at the present time, and that the outlook is most encouraging.

AFFAIRS AT CAMP DE LAMAR

Splendid Showing in the Magnolia Mine and Adjoining Property.

E. D. Turner and W. L. Scott, who reside over the destinies of De Lamar's bullion coach in its frequent trips between De Lamar, Nev., and Milford, Utah, were in the city yesterday.

have been kept pumped out and during the time the receivers were in possession a good deal of development work was done by leasers. Some large reserves have been in sight and ready to be taken out to supply the smelting plant at any time. The smelter now being used by the Boston & Montana company has a daily capacity of 500 tons of ore, and is kept in the best possible condition by the Boston & Montana company and will be ready to start on the ore of the reorganized company at any time it is required.

The work of reorganization was a big undertaking when it is known that over 1,000 people held interests which included the Boston & Montana and three-fourths per cent. of the bonds were represented and put in the hands of the reorganized people.

The securities were deposited with the Old Colony Trust company, of which Francis B. Hart is vice-president and E. A. Pheppan secretary. The reorganization committee consisted of E. Rollins Morse, chairman; Samuel Carr Gordon Abbott, William A. Gaston and Thomas Nelson, the latter being secretary of the Boston & Montana company. In order to perfect the reorganization the committee was necessary to have an ironclad agreement which was signed by all those interested in the old company.

A NEW COMPANY.

Articles of Incorporation of the New Humboldt Filed.

Articles of incorporation of the East Humboldt Mining and Milling company were filed at the county clerk's office yesterday afternoon. The incorporators are: R. G. Wilson, Eureka, John W. Burton, John R. Middlemiss, Harry A. Moore, Henry C. Kruse, John M. Murray and George D. Shell, all of this city. The company is capitalized at \$250,000 in shares of \$5 each, and the officers are: R. G. Wilson, president and general manager; John W. Burton, vice-president; John R. Middlemiss, treasurer and Harry A. Moore, secretary.

The company will operate in the Tintic district, and the lead and silver mines, the Blackwell, and the Diamond Dick mining lodes.

Mining at Great Depths.

B. H. Brough, in his recent lecture on "The Problems Associated With Mining at Great Depths," said that the maximum depth had reached 4,900 feet at the Calumet and Hecla mine, and the lead and silver mines, the Blackwell, and the Diamond Dick mining lodes.

of the Brooklyn lode, about a mile north of Eureka, Tintic, informs The Herald that the outlook for this property is most promising. At the present time the shaft in the Brooklyn is down to the 200-foot level, and Mr. Smith states that he has every reason to believe that the bottom is on the top of a body of ore, and he expects to receive word at any time that the men at work in the mine have uncovered a fine deposit of pay mineral.

A large number of the creditors of the Bank of Nevada have accepted Mr. Peck's proposition for a settlement, and yesterday several of the leading citizens of the city sent word that they would settle on the basis proposed, and it will not be long now before they will be holders of Dalton and Lark stock. Reports from the mine are of a most encouraging nature, and the stock advanced in lead quotations takes place the property will soon resume heavy ore shipments.

After the call of the mining exchange yesterday the name of J. C. Conklin was mentioned for a settlement, and a motion was made to suspend the rules and elect him by acclamation. It was found, however, that this could not be done without a violation of the by-laws of the board. A motion was then made and carried that Conklin be given the privilege of the floor until the next meeting of the board for action in the proper manner. Mr. Conklin was one of the charter members of the old exchange and was one of the most active brokers on its floor. His name will be a valuable acquisition to the new board.

The shipments of ore from the Utah and Galena mines, concerning which mention was made in the Herald, were the richest that have been made from these properties for some time. The lot of Utah, comprising 100 tons, was sold at \$1.00 per ton and 27.5 ounces in silver to the ton, while the shipment of Galena, consisting of 100 tons, was sold at \$1.00 per ton and 27.5 ounces in silver to the ton. It is stated that both of these shipments were made in a most careful and accurate manner, and it is believed that the Utah will resume the payment of dividends this month. At the office of the company it is learned that there have been more stock transfers of the Utah and Galena during the past week than has been the case for the last 12 months.

L. H. Mitchell, geologist and engineer, who has opened an office with Professor Charles Butters in the De Lamar building, has been in the city for some time. Mitchell has been in the city for some time, and he is believed that the Utah will resume the payment of dividends this month. At the office of the company it is learned that there have been more stock transfers of the Utah and Galena during the past week than has been the case for the last 12 months.

PROBABLY A MISTAKE.

Coleman's Arrest May Prove a Boomerang For Someone.

Washington, Feb. 4.—The impression that the inspectors of the postoffice department have made a mistake in arresting Hamilton E. Coleman, in New York City, on charges of stealing uncancelled stamps used for postage on mail matter, is being spread by the New York state senate investigating committee, and continued advice from Washington that the differential duty on refined sugar will be reduced, operated against the industrial group. Sugar fell from 11 1/2 to 11 1/4, while leather preferred declined 1/4 to 5/8, and Lead 1/4 to 2 1/2. Chicago grain was sold down 1/4 to 7/8, on advice from Springfield that a bill will be introduced in the Illinois legislature reducing the price of grain in the state. Officials of the company in the state of Colorado, to the matter. The traders yielded about a half cent, and Louisville and Nashville and General Electric were 1/4 to 1/2, and St. Paul and Northern Pacific declined 1/4 to 5/8, and Big Four 1/4 to 3/4, while New Haven and Hartford on purchases of odd lots, jumped 4 points to 16 1/2, and Long Island 1/4 to 5/8. The market closed quiet in tone. Net changes showed declines of 4 1/2. Jersey Central, Sugar and Leather preferred, however, lost 1/4 to 1/2, and St. Paul and Northern Pacific, 1/4 to 5/8, and Big Four 1/4 to 3/4, while New Haven and Hartford on purchases of odd lots, jumped 4 points to 16 1/2, and Long Island 1/4 to 5/8. The market closed quiet in tone. Net changes showed declines of 4 1/2. Jersey Central, Sugar and Leather preferred, however, lost 1/4 to 1/2, and St. Paul and Northern Pacific, 1/4 to 5/8, and Big Four 1/4 to 3/4, while New Haven and Hartford on purchases of odd lots, jumped 4 points to 16 1/2, and Long Island 1/4 to 5/8. The market closed quiet in tone. Net changes showed declines of 4 1/2.
